
Mr. Dale Martin Harrison

Personal Details

Address: 46, Greenbank Road, Mossley Hill, Liverpool, Merseyside, L18 1HN.

Nat. Ins. No.: NE-75-02-90-B **DfES:** 11/49021

Mobile: 07939 984 649 **E-mail:** dale.harrison@cambria.ac.uk **Driving Licence:** Full/Clean

Person Specification

- I can teach units on the **Level 3 digital Technologies course**: Beginner Programming in Java; Relational Database; Project Management and Systems Analysis and Design. I have taught these units for the past 6 years. I have delivered lessons for Relational Database Design and Development using Microsoft Access or C# front end, MS SQL Server 2016 and for Beginner Programming, using the NetBeans or Eclipse IDE. Wirral Metropolitan College are linked to Chester University with this course and I liaise with the staff in the university.
 - I teach **BTEC Level 3** Units: Game Design; Programming in Java; Creating Systems to Manage Information; Data Modelling; Project Management; Event Driven Programming with Visual Basic in Visual Studio; Relational Database; Systems Analysis and Design; Website Design; Organisational Systems Security; Data (Spreadsheet) Modelling. I also teach similar units on the BTEC Level 1: Creating a Program in Scratch and Level 2 and 3 Creating Digital Graphics.
 - I have been course tutor for two separate classes responsible for communicating with parents/guardians in order to give updates on attendance and for the purpose of holding parent's/guardian evenings. I have delivered tutorials to both of these classes for the past three years. I also promote open evenings and hold interviews for prospective students.
 - I make sure that I have a detailed scheme of work along with lesson plans in order to teach the units effectively and within the proposed time-scale of a lesson.
 - I keep a tracker for each class that I take, in order to be able to follow any of my student's progress. I use the tracker to see if students have handed in assignments on time or not.
 - I make uploads and edit the Virtual Campus all of the time for the students. I use a range of teaching strategies such as direct instruction, scaffold learning, questioning techniques, differentiated instruction and also providing timely and appropriate feedback.
 - I have been teaching **ICT Functional Skills** and I collaborate with many assessors and give them updates about all of the apprentices that I have managed to get through their exams at a 100% pass rate.
 - I adapt learning materials to suit learners from external companies and I also produce my own set of worksheets in order to teach MS Office on **bespoke day courses**. I prepare my own class materials, assignments, mark students' work including exams and give constructive feedback. I prepare and create learning materials for apprentices, BTEC and Foundation degree students. I moderate marked work with other tutors in my team.
-
